

	S1 sense	S2 geom. est.	S3 channel est.	S4 optimise	S5 control tx	S6 electronic update	S7 mechanical morphing	S8 settling	S9 calibration	S10 stabilised RF
A1 theoretical FIM [1], [2], [3], [15]			A	A			A			A
A3 flexible programmable aperture [6] (geometry imposed)	M	M		M	M	M			D	M*
A5 rigid reconfigurable RIS [4], [5]					M	M				M
A4 self-morphing mechanical [7], [8] (no RF layer)	M	M		M	M		M	M		
A7 flexible active array [20]	D	D		D	D	D			D	M

no reviewed source measures these four stages
on an aperture that radiates

* geometry held static throughout the measured interval

■ M measured (start and end events stated) ■ A assumed or simulated
 ■ D demonstrated, no duration reported □ absent / not applicable
